1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uyama et al essentially for reasons of record as set forth in paragraph 2 of the previous action with these additional comments.

Uyama et al shows the instant thickness of the substrate, with a base member thickness of 12 microns and the additional layers being in the micron range of thickness. In that European -945 is no better than a cumulative reference with respect to Uyama et al, European -945 has been dropped from the rejection.

2.Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uyama et al in view of Coombs et al -530 for reasons of record.

3.Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uyama et al in view of the admitted prior art as set forth at page 2, lines 14-21 of the instant specification for reasons of record.

4.Applicant's arguments filed August 25, 2008 have been fully considered but they are not persuasive. Essentially, European -945 is no more than cumulative with respect to Uyama et al concerning the placement of the information layers and does not disclose any thickness for the substrate. While applicant's comments with respect to European -945 are persuasive, and this reference has been dropped from the rejection, the comments directed to Uyama et al are not and this rejection has been maintained.

As already discussed at some length, it is submitted that the comparison prints submitted in the declaration of May 2007 allegedly showing an unexpected result over Uyama et al are not probative in this regard. Applicant has not shown that the instant method provides a security article that is any better than that disclosed in Uyama et al, and hence the methods making the articles would have been obvious over each other.

5.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
